

RADIO VATICANA

Città del Vaticano, 3 dicembre 2013

---

DIREZIONE GENERALE

### **CHANGE OF TECHNICAL PARAMETERS AUDIO CHANNEL OF VATICAN RADIO ON EUTELSAT 1 SATELLITE**

Dear Friends, dear Broadcaster,

We inform you that the audio channel of Vatican Radio on Eutelsat 1 Satellite has moved to a new frequency on HotBird 13B. In order to continue receiving the audio channel of Vatican Radio, it is necessary to retune your receiver in these two possible ways:

- Make an automatic retuning of your receiver (it should recognize by itself the new channel)
- Set the following parameters manually:

HotBird 13B  
F= 12034 MHz V  
Tp = 66  
Service ID = 11181  
DVBS= QPSK  
SR = 29900  
FEC = 5/6

The channel is inserted in the Sky bouquet, but it is available for free to everyone. It is therefore **not** necessary to change the receiver (nor to re-point the satellite dish).

The label is still Radio Vaticana, but in a few days it will change to "Radio Vaticana Italia-Europa".
